#21618 “Air Transport of Perishable Products”

\$12.00

Authors: James F. Thompson, C.F.H. Bishop, Patrick E. Brecht,
 2004 – 22 pages

Description: The third in a series of award-winning publications on proper transportation of perishables. Here you'll find comprehensive information on protecting the product from the temperature extremes that are common in air freight, selecting the proper boxes for shipment, how to plan a load, product compatibility, loading air freight containers, and how to monitor and record temperature during transit. The publication also describes the advantages and disadvantages of air freight and describes the services provided by freight forwarders.

Table of Contents:

Acknowledgements.....	inside back cover
Introduction.....	1
Selecting Packaging for Air Freight	5
Packing the Product	6
Load Planning.....	7
