

FEDERAL MILK ORDER MARKETING AND UTILIZATION SUMMARY, SEPTEMBER 2014

HIGHLIGHTS. Handler reports of receipts and utilization under the Federal milk order system for September 2014 have been filed and tabulated. Combined totals for the 10 consolidated orders are being released. During September, more than 10.8 billion pounds of milk were received from Federally pooled producers. This volume of milk is 5.1 percent higher than the September 2013 volume. In September 2014 and September 2013, there were volumes of milk not pooled due to intraorder disadvantageous price relationships. Regulated handlers pooled 3.493 billion pounds of producer milk as Class I products, up slightly by 0.3 percent when compared to the previous year. Class I utilization decreased in 6 of the 10 of the Federal Milk Order Marketing areas. The all-market average Class utilization percentages were: Class I = 32%, Class II =11%, Class III = 47%, and Class IV = 10%. The weighted average statistical uniform price was \$25.47 per cwt, \$1.17 higher than last month and \$5.72 higher than last year.

1/ Names in parentheses are the major city in the principal pricing point of the market.

2/ Statistical uniform price for component pricing orders (Class III price plus producer price differential). For other orders, uniform skim milk price times 0.965 plus uniform butterfat price times 3.5.

3/ Due to a disadvantageous relationship between intraorder class prices and the location adjusted statistical uniform price in these markets, handlers elected not to pool an estimated 491.6 million pounds of milk that normally would have been associated with these markets. In September 2013, the estimated not pooled volume of milk was 496.5 million pounds, occurring in order numbers 030, 032, 033, 124, and 126. After adjusting for non pooled milk, the year-to-year percent change is -4.6%.
