1/ Number of orders under which milk produced by dairy farmers located in the State was marketed to regulated handlers. For example, milk produced in Maryland was marketed under five Federal milk orders in 2008. The regional figure is the net number of orders under which the milk produced by dairy farmers located in the region was marketed to regulated handlers.

1/ The source of the receipt is based on the location of the producer, not the location of the regulated handler. Marketing area totals may not add due to rounding. 2/ For some marketing areas, receipts from some states have been combined to protect confidentiality. The states are listed by decreasing proportions of deliveries to the marketing area. For some marketing areas, handlers elected not to pool producer milk that normally would have been associated with the marketing area due to disadvantageous price relationships.
